

BRUIN HS1100

THE BRUIN MODEL HS1100 SPRAYER

The best in the world, re-engineered in America. The preferred self-propelled sprayer of the largest farming operations across Europe has now been redesigned for North American farmers and custom applicators. Bruin Sprayers combine proven spray application technology with new performance features and specifications specially tailored for the needs of farmers in North America.

The HS1100 sprayer was engineered for farmers and customer applicators who want maximum strength, stability and performance in a self-propelled sprayer. The HS1100 adjusts automatically from 60 to 70 inches — making it the tallest rear boom sprayer available in North America. The 120-foot boom package provides maximum reach to spray more acres per hour and a unique stabilization system for unmatched stability and flexibility. Plus, it's the only sprayer in its class backed by a five-year powertrain warranty.
